Berlin, 13th—The latest news from Italy has filled the Conservative party with terror, which is increased by the defecit of fifty million francs in the Italian Budget, the extravagance of the Italian Government, the outlay for the army and navy, rendered indispensible by the Triple Alliance, the fresh outlay of millions for the Massouah expedition, and the breaking off of the negotiations for a Commercial Treaty with France, all of which have caused great misery in Italy. In some Italian cities the Municipalities have been forced to undertake public works to avoid either riots, or the death of the masses from hunger. The responsibility of a rupture with France will fall on the Government and dynasty that have bound the country to the Triple Alliance.

THE SANTA FE LOAN.

This recent loan, which was arranged last month by Governor Galvez with the house of S. B. Hale and Co. is, but the balance, or rather the remaining half of the original bank loan for 20 millions authorized by law of 1888. The object of the loan is to deposit gold in the National Treasury under the free banking law, and obtain bank notes and gold bonds for the amount.

The present loan is, therefore, for ten millions of bonds, 5 per cent interest and 1 per cent amortization, and negotiated at 85, which speaks rather well for the credit of Santa Fé, as none of the other provinces except Buenos Ayres can to the present borrow money at 5 per cent, Mendoza, Cordoba etc. have made 6 per cent loans and negotiated them at 86, which brings the loan out at 6.98, while the 5 per cent loan done at 85 brings it out at 5.85, a very favorable difference for Santa Fé. What the first of half of this loan was done at we don't remember; but we believe the present is the most advantageous loan business Santa Fe has ever done and we congratulate Governor Galvez on the operation.

The Provincial Bank of Santa Fé will now have a greatly increased capital; and although cheap money is an object, still the Directors of the Santa Fé Bank will have to use the greatest caution. Rosario is not Buenos Ayres, and to flood it with bank notes would be a very serious error. Already the rise in values in every description of Rosario property is said to be even greater than in Buenos Ayres. The Rosario money market is flooded with land 'pagares', and the general expansion going on up there is so great that bankers, and particularly official bankers, should use every caution, and restrict as far as possible the land speculation. The best way to do this is to refuse to discount all land bills. No well managed Rosario bank should have a land bill in its "carteras". Things are going ahead fast in Buenos Ayres, but they are going on still faster in Rosario; and now that the Provincial Bank will be entitled to 9 millions more notes, the capital of the Provincial Bank of Santa Fé will very soon be on a parity with that of the Provincial Bank of Buenos Ayres.

RAILWAY SAFETY AND ECONOMY.

TWO YEARS' FRESH LEASE OF LIFE TO RAILS.

On the question of saving in maintenance and greater security to the travelling public by a better attention to details of fishing rails etc.

FOR THE CAUSE THAT LACKS ASSISTANCE;
FOR THE EVIL THAT NAUGHT RESISTANCE;
FOR THE GOOD THAT I CAN DO;
Every bad contractor must remain my foe.

Sir

I see that also you have become a convert to lock nuts—evidently after perusing the writings of the Editor of the *Indian Engineer*, embodied in an 'Open Letter' to the Railway Conference that lately sat in Simla, published in Calcutta and so widely circulated round the world that the views therein set forth on brakes, tyres, buffing and draw-gear, permanent-way, railway-attachés, technical museums, etc., seem to find a strong echo everywhere. Since that book was published, you will have seen the following extract from the *Indian Engineer* in its issue of 17th October 1888, wherein, after dealing minutely with the subject of lock-nuts and steel bolts, recommending their use, and after pointing out some defects in all lock nuts except the 'Eureka', the editor says:

"The "Eureka," which was fully dealt with in issues of 3rd and 8th March last, appears, however, to be free from these objections. It is certainly giving better results in India than any other form that has been tried up to date."

Although I have, with the knowledge of all fish-bolt fastenings, pronounced the 'Eureka' the best vibration-proof safety-nut and the most mechanical contrivance of its kind; and although I have no pecuniary interest in the 'Eureka', which is made by a firm that probably is the oldest and largest concern of bolt and nut makers in the world—Messrs. Bayliss Jones and Bayliss, of London and Wolverhampton, who, the same as other manufacturers, have consulted me about certain points or details in lock-nuts, I must confess that it was quite another nut that in 1877 earned for me the title of 'father of lock-nuts' alluded to by the *Indian Engineer*, and referred to by you. This first historical lock-nut, that I designed in Queensland, 12 years ago, cut its way on to the bolt, and each nut, with sharp edges, made a perfect fit for itself on the bolt. This nut and the later one with 4 slits, suggested by me and patented by my Svedenborgian friend Mr. Ibbotson of Florence, were the first lock-nuts, followed by a host of crude make shifts and imitations, for which many hundred worthless patents were filed, all of which shams have been eclipsed by the 'Eureka', a nut that, in its latest form, with triple pyramids, double action, and with a tip-protecting collar or boss, is not, like the others, merely a tight nut, but a mechanically locking nut, having no slits to weaken it and cause rust-binding, and being capable of an ordinary 24 to 30 inch spanner being used, so that the former baneful twisting strains (complained of by the Board of Trade Chief Inspector, when, with over-tight nuts, long spanners had to be resorted to) are now avoided by using the 'Eureka', allowing, moreover, an ordinary 24 to 30 inch spanner to be used, so that one avoids the *twisting* strains that are so baneful to the life of a bolt. You will remember that Colonel Rich, our Board of Trade Chief-Inspector, after the railway accident on the 16th of May, 1887, between Buckpool and Port Gordon stations, on the Great North of Scotland Railway, declared that all the loss of life and damage to valuable property were caused by the differential diameter in Ibbotson's 4 slit nut having been too great, requiring up to 5 feet spanners to screw up with, which enormous spanners made the gangers to jam the fastenings up too much; since then I have advised manufacturers to endeavour to make lock-nuts vibration proof, but not tighter than that an ordinary 24 to 30 inch spanner can be used, so as to avoid the *twisting* strains, which Mr. Meridith, the founder of the English Permanent Way Inspectors' Association, found to be the worst enemy of fish bolts. This problem of making a nut withstand any unscrewing motion set up by passing trains, and at the same time use a short spanner, the makers of the "Eureka" have accomplished by a double action in their ingenious tightening contrivance.

From the extensive schedules of tests that I send you, you will see that the "Eureka", in Australia, proved from 139 to 154 per cent better than the 4 slit lock-nut, and in India from 63 to 84 per cent better; while, compared with the ordinary nut, the "Eureka" came out from 137 to 1899 per cent better.

In your issue of the 7th inst. you suggest the "Eureka" should be used in the Argentine Confederation. For your information and that of your readers, I beg to say that the well known contractors, Don Mateo and Don Juan Clark, although not required to do so by their contract, have sent steel bolts and "Eureka" lock-nuts for a large portion of the Central Corrientes, Misiones and Monte Caseros Line; the "Great Southern of Buenos Aires", as the F. C. del Sud is called in England, has specified the "Eureka"; so have Mr. Wilkinson, Messrs. Pelleschi and MacKinlay; it is being made for the Great Western Argentine, while Mr. Clarke of the Buenos Ayres and Rosario has recommended its use, at the same time as Mr. Fisher of the Central Argentine states that his Chief Permanent Way Engineer considers it a very excellent nut; besides, Mr. Shaw, before leaving the "Ensenada", studied the "Eureka" thoroughly, with his well known mechanical instinct and clear insight, and gave in writing his opinion that it was "as superior to the 4 slit nut as the latter was to the ordinary nut", and asked for all future fish-bolts to be sent of the "Eureka" type.

The schedules of tests herewith, made by the Ferro-Carril del Sud, show clearly that the "Eureka" was superior to all other contrivances tested. The test-sheets at the loco-shops of the Buenos Ayres and Rosario Railway, also herewith, are equally conclusive in proving the "Eureka" the victor over all the other competing fastenings. I commend the test-sheets to you for a careful examination.

For tramways such a nut is even a greater boon than for railways, as tramway nuts cannot be readily got at to be tightened up.

As a persistent student of railway economy, I have already spoken with many railway-men here, and only found one firm (contractors), whose engineer could not spare time to make any tests and consider the subject of improvements in permanent way, continuous brakes and buffers, etc., and who, when asked, what he thought of tight-coupling-centre-buffers, as used in India and on your N. W. Argentine Railway, remarked that his waggons soon shook themselves to pieces, so that he did not see the use of any better centre-buffers; these buffers at present outlasted his waggons (!), thus showing me that he probably was too over-worked to comprehend, for the time being, that the slack, inefficient buffers, he was using, were the cause of his waggons' shaking themselves to pieces so soon; but, no doubt, at his leisure, our short conversation will bear fruit.

In India, no centre-buffer fitted stock is allowed to run except with tight coupling radiating buffers, which have proved to prolong the life of the rolling-stock and make travelling on narrow-gauged lines more comfortable by reducing oscillation to a minimum.

Men like Sir Guilford Molesworth, Colonel Conway-Gordon, Sir Alexander Rendel, Sir Douglas Fox, and Sir George B. Bruce, specify tight-coupling centre-buffers, and Mr. Woods had lately had them fitted to all the stock for the new Chilian Nitrate Railways. Let some of your readers look at the tight-couplers on the North Western Argentine and compare them with what government allows to be used on the metre gauge of the Northern provinces.

I should, respecting lock-nuts, not have omitted to mention Messrs. Budge, Malmén (of Hume Brothers), Valiente Noailles, Firmat, Toledo (Metropolitan Tramway), Fred. Perry, Frewin, Angus, Valpy, Morice, and others, of the Eastern Argentine, Paraguay Extensions, Cruz del Eje, Uruguay Northern, Western, Uruguay Midland, West Santa Fecino, Monte Caseros, and other neighboring railways, as having declared themselves to be converts to the plan of using steel-bolts and Eureka lock-nuts, which I recommend until some other contrivance be proved to be a still greater improvement.

But while the manufacturers of make-shift shams, imitation lock-nuts, also supply London engineers, South American agents, and others with cast iron and steel patent sleepers, and other goods, that run into very big figures, and allow of great personal attention being paid to the "clientèle", the makers of the "Eureka" in their general business, only supply articles for which they have to compete by public tender, and have to cut prices so extremely low that the small profit does not allow of them wasting much time over "chumming in" with the London buyers; besides which, the "Eureka" manufacturers keep no travellers, while some of the other firms do. This is the real reason of sham lock-nuts having been sent out to South America in larger quantities than the "Eureka". However, if engineers call on Messrs. Bayliss and Jones, they will find them true English gentlemen and good men of business; some of them are J. P.'s and directors of several joint stock companies, banks, etc., and shareholders in most of the Indian and South American railways, possessing, in fact, all the elements that constitute respectability in England. I have persuaded Messrs. Bayliss, Jones and Bayliss to appoint a good House in Buenos Ayres agents for the "Eureka", so eventually this country may get the benefit of "good fishing" and consequent reduction in maintenance-bill.

Remember the Hindoo proverb:—
"Though the surface to rise in the trees, fire to be cold, and the lotus bloom from a bed of a rocky bed, that which a true and fearless champion sayeth will not remain an empty word."

Yours, etc.,
E. L. THOMASSEN,
Hon. M. I. Permanent Way Inspect: of Great Britain.

P. S.—You will observe from the accompanying treatise by a well-known District Engineer on the English Midland Railway that his investigations during eight years on 200 miles of observation lengths, laid with lock-nut bolts, spring washer-fitted bolts, and with ordinary bolts and nuts, in competion, proved the lock-nuts to have given an extra life of two years to the rails, and to have effected a saving of £105 per mile per annum. This is my excuse for not tiring of drawing the attention of railway men to lock-nuts, and I trust that the importance of the subject will cause you to go into that, also in your columns, when you see it is for the benefit of this, your adopted country. *E. S. T.*

(Ed. Note.)

We have carefully looked through the test sheets and interesting particulars sent us, and must say that Mr. Meredith's paper reveals a most careful investigation of the subject of the saving that lock-nuts effect by giving rails and fishplates a much longer life, lessening expenditure on ballast, causing joint-sleepers to last longer and requiring less lifting and packing. The extensive tests made by the Locomotive Superintendent of the Buenos Aires and Rosario Railway, deputed ad hoc, show the "Eureka" lock nut to have an average capacity of 32, 24, 18, 20, 17 and 15, respectively, the first, second, third, fourth fifth and sixth time of being used, as compared with the 4-slit nuts only standing on an average 14, 12, 7, 5 and 4 lbs. on spanner-end, each nut tested six times, the same as the "Eureka" while the "Grover" washer fitted nuts only stood 5, 10, 11, 8, 7 and 6 lbs, even when screwed up against a firm surface, whereas the tests of the other nuts were made without any bite or surface friction against the fishplate, to represent, in their case, the position which they would occupy before the ganger had performed his daily screwing up. This sheet mentions a case of the "Eureka" tests embracing 1560 screwing and unscrewing operations with the result of a large average capacity. The tests on the Ferro Carril del Sud give the Eureka a capacity of 39, 40, 26, 25, 26 and 24 lbs, as against "4 slits" standing only 27, 21, 15, 14, 10 and 11 lbs., and "compressed nuts" standing only 12, 8, 12, 10, 9 and 8 lbs., while spring washer nuts stood only 3, 5, 4, 11, 7 and 6 lbs, tested in the same way as on the Buenos Ayres and Rosario Line, it being understood that several spring washers broke during screwing up, that in the road many of the "4 slit nuts" were rust bound and had to be broken, and that the "Eureka" was put on and taken off with a spanner not exceeding 28 inches, and that many so-called lock-nuts (imitations) were not found worth putting on record, as they, like the ordinary nuts, moved off with the weight of the spanner alone, without applying any weight to its extremity.

It is also mentioned, in the papers perused, that by making the protuberances or "pyramids" in the "Eureka" larger, any required degree of capacity can be attained, a larger unscrewing resistance being required, for instance, for armour-plate nuts.

Amongst the papers sent us are also records of tests made by Kirkaldy & Son and by Professor Kennedy, of the London University, showing similar results to those given by the Buenos Ayres and Campana tests. The facsimiles sent us of reports by English Engineers are conclusively in favor of the Eureka, even, in one case, with a traffic of 140 trains per diem.

If Mr. Thomassen, our newly gazetted "Special Inspector," proves as careful in inspecting our iron roads as he has been active as a champion of a better system of permanent way, buffing and draw-gear, etc., his advent will prove a public boon.

RACING AT PALERMO

A fair day's sport was witnessed on Sunday—somewhat monotonous, it is true, in the continued success of the favorites and of the Stud Luis Chico, which had a regular field day, every one of their four representatives reaching the post in front of their respective opponents.

In the first race of the day, the Premio Wanda, the usual scandal took place, Bijou being palpably pulled, right in front of the stand, at the same time interfering with the chances of Wanda. The jockey of Bijou and the colt were promptly disqualified for an indefinite period. After Surplice had landed the premium Relampago with the greatest possible ease, his stable companion Alicia played a similar trump card in the chief race of the day, the 'Progreso'. The Premio Compensacion was a more exciting affair, for, after Miss Rovel had, after the first 200 yards, cut out the whole of the work and apparently beaten Portezito half a mile from home, he came again and catching her 2 strides from the post, won by a neck; the result would assuredly have been different, had it not been for the suicidal policy adopted with the mare. The Stud Acebal had matters all their own way in the Premio Brujo; but in connection with this race, we have seriously to complain on the part of the public that the weight of Selim should have been allowed to appear on the card as 43 ks., whereas it should have been 40 ks., a trifling difference of a stone.

PARIS LETTER

(From our own Correspondent)

Paris, 27th March

Although everyone, outside the narrow circle of partizan zealots and fanatical politicians, desires that the Tirard Exhibition Cabinet will hold on till October next, it is problematical whether it may be able to do so. Either from its own blunderings, or the parliamentary chaos, it is so tossed and hurtled that it may go under. It is not unlike the man who fell into a river and exclaimed: "I will be drowned, and nobody shall save me."

Public opinion takes not the slightest interest—except to heave a sigh of sadness—at the inter-raging strife of the deputies and journals. It would seem that France has no other work to do than the extirpation of Boulangism. Even, were it crushed to-morrow, that will not rectify the budget; diminish taxation; accord religious liberty; cease laicising hospitals and hospices; making secular education compulsory and so offending the majority of the Catholic population; awarding the right of association, and making officials responsible for their administrative misconduct. Instead of dealing with these necessary reforms, and that would heal many open wounds, and close up numerous divisions, the parliament labors more and more industriously to vote measures to crimp freedom of election in the matter of candidatures, muzzle universal suffrage, put a break on the press, and resort to lesser measures to restrain the expression of opinion which is decidedly hostile to the ways and means resorted to for the government of the republic, and the combating of dissidents.

M. Antoine, by this, is fully able to measure the error he has committed in throwing his Alsatian popularity into the "melée" of home volcanic politics. Instead of remaining national, he has become partizan, and as a weapon for the suppression of Boulangism he is of no more value than the unexiled Duc d'Aumale. Boulanger, he forgets, is not a personality, but an instrument taken up by wide-spread discontent to bring about some vague change, that the majority of the country expects will be secured by his victory over the coalition in power. Boulanger has no more a remedy for the ills of France than any other individual. Those ills are visible to every naked eye, and the remedy is open to every medicine man. Those who believe that the general elections will prove a heal-all labor under a delusion. They will eliminate the hare and bacon bacon and hare ministerial "menus;" will return new men. But so long as the French are resolved to remain sectionized; to continue royalist, imperialist, republican, radical, and anarchist; confederating to demolish, dividing to construct, there can be no permanent stability, no practical home tranquillity.

The Emperor of Germany's dining with the French Ambassador at Berlin was not viewed with pleasure by those who sympathize with the sentiments and expectations of Messrs. Paul Déroulede and Antoine. The return compliment, President Carnot dining with the German Ambassador, is a still bitterer pill. There is no doubt of the depth, keenness and sincerity of the affection of the two millions of separated Alsatians and Lorrainers for France. And while the latter still wear weeds for the lost provinces, but keep high hearts to be French again, they feel pained at the exchange of knife and fork music, when harps hang on willow trees and weeping continues by the waters of Babylon. An attempt was made to organize a procession of Alsatian women, dressed in their deepest national mourning, to march past the German embassy on the night of the dinner, in solemn silence. There will be a profusion of fresh *regrets* wreaths hung on the statue of "Strasbourg" on the Place de Concorde. But no crape bandage will be allowed to be placed over her eyes, as was done in February 1871, when the Prussians entered Paris for a twenty-four hours occupation.

The situation of the Comptoir d'Escompte is pitiable and reprehensible. Certainly all does not appear to be settled in that once trusted establishment. The assignee is at work, examining the leakages by which the ship went down. He will be authorized to negotiate the business of the defunct Comptoir, and the right to continue its title. But where the astonishment takes away the breath is, that the victimized shareholders have been treated as if they never existed. The Minister of Finance interferes to save—"who", everybody inquires? He passes over the heads of the shareholders—all ruined—by starring another Comptoir, and the Minister of Justice declines to interfere to prosecute the administrators who ruined the bank by the violation of the statutes. The shareholders themselves are an extraordinary lot, for not having immediately called an indignation meeting—a splendid Anglo-Saxon institution—and forced the criminal prosecution of the administrators. Now, some of these *moutons* have roused up from their Sleepy Hollows. But will they have the energy to fight it out to the bitter end? Between Panama, the Comptoir d'Escompte and other big financial smashes, M. Beaulieu estimates that the capital of France has lost during the last twelve months a reduction to the amount of 1,800 million francs. That's a big hole in the old stocking.

It is pleasant to quit this *milieu* of strife, sadness and suffering, to stroll through the Exhibition, where the finishing up proceeds actively. A good deal in the way of completion will have to be done after Opening Day. Uncle Sam has thrown off his jacket in right earnest. He will be very strong at the Big Fair, and will have 1,500 exhibitors. Edison alone has a monster show to himself. Twenty printers are to be represented, and their court will be called, "Printing House Square". Round the walls will be the names of all the typographical celebrities. Within stone's throw, naturally, is the "Press Pavillion". It is a pretty toy structure, fitted up with all the comforts of a gorgeous salon, in point of decoration. The dining hall alone is the size, in superficies, of the rest of the building. There are numerous book cases, all empty so far. I begged the obliging superintendent to not put as much as a yellow-covered novel on the shelves. Every journalist worth his salt ought to carry his library in his head.

The 1889 exhibition will be more national than inter-national: Judge. The number of exhibitors for the shows of 1867, 1878 and 1889 had the uniform total of 52,000; but the number of foreign exhibitors was respectively, 36,000, 26,000 and 16,000. The French themselves this year occupy the numerical position that the intelligent foreigner did in 1867—viz., a total of 36,000 out of 52,000. The current Fair will occupy 33,000 square yards more than that of 1876, and it will have more isolated national exhibitions, like the Argentine Republic, on the Champ de Mars. It is only fair that justice should be done to the gallery of machines, and its magnificent span of some 340 feet. It is a wonderful feat, equally as wonderful as the Eiffel Tower, and will cost as much—seven million francs. It will have a total shafting of 1,496 yards, worked by 32 engines, representing an aggregate of 24,000 horse power; the shafts run along and overhead in four parallel rows. In the evening the Exhibition will be lit up by electricity, provided by a joint committee of English, French, Belgian and Swiss Exhibitors. There will be a total of 180,000 lights, of which 80,000 are for the machines' gallery alone.

The entrance fee will be one franc from 10 till 6 p.m., two francs from 8 till 10 a.m., —the study hours, and two francs from 6 to 11 p.m. There will be leg-saving facilities. The Decauville Grand Trunk Liliputian railway, nearly two miles long, will take the visitor up to Concorde bridge, switch him along the Quai d'Orsay sections, pass in front of the Eiffel Tower, where the line dips into a "Mt. Cenis" tunnel 120 yards long; then passes up the right side of the Champ de Mars, across frontage of the Ecole Militaire, and down the west side of the Champ to reach the Concorde terminus. There will be only three intermediary stations—before the Eiffel Tower, and midway on each side of the Champ de Mars. The uniform fare will be five sous. There will be eight carriages to the train, each carrying 16 persons, back to back. The engines will weigh nine to twelve tons, and represent 85 horse power. Trains will start every ten minutes from 9 a.m. till midnight. Besides, there will be troops of donkies imported from Egypt, and a flotilla of Bath chairs, and batallions of litter men. So that the steamboat companies need not hesitate to bring all the Argentines—therein included sturdy invalids.

M. Edward de Saint—O—for five years secretary to the French Consulate in your city, has just been sentenced to two years imprisonment. In 1877 he was in a dragoon regiment, but deserted to the Argentine Republic, where all trace was lost of him. He was a man of winning manners and successful address. A wanderer by temperament, he left Buenos Ayres, and resided respectively in Spain, England, and Italy. In the latter kingdom he gave his attention to literature, and then became journalist. His articles were too Gallic for Signor Crispi, who requested him to cross to the frontier, when the French arrested him. He was tried by a court martial for desertion. He disliked the sword and fled to take up the pen.

Some miners who figured in the great strike of Deazeville in 1886, left for B. Ayres. Several of their number have just come back, denouncing emigration in general, and to San Francisco and your Republic in particular. The Prefet Bonnier, of Aveyron, has issued a notice warning his flock to be on their guard against the promises of B. Ayres emigration agents. This functionary seems to have been in a hurry, as a M. "Le de L——" writes to the papers, stating that he too has just returned from B. Ayres; has witnessed emigrants landing who were all in rags, till clothed by the British colonists' fund in your city; that these emigrants were offered £1 per day wages, which they declined, alleging they had higher wages at home. May the Lord have mercy on their souls! One Irish landholder offered to settle over two hundred of the emigrants in holdings of their own, set them up on his estate. But the attractions of home, starvation and misery prevailed. Wonder if M Bonnier would put up this side of the story. France does not want her people to emigrate anywhere; unfortunately for that China-Wallism, the advantages of the Argentine Republic are too well-known in France. Loafing emigrants had better stay at home.

THE SARMIENTO-FERNANDEZ AFFAIR. KILOMETRAGE AND TRAFFIC RETURNS OF THE PRIMER ENTRE-RIANO FOR LAST MONTH.

On making inquiry yesterday in regard to the course of the "little affair" between Mr. Sarmiento, manager of the Andine, and Inspector Fernandez, which, by the way, is now assuming nasty proportions and will be ventilated in the courts, we learned that Mr. J. C. Cortinez had furnished his report on the quarrel. The report was laid before Dr. Araoz last evening, and we regret to say we did not succeed in obtaining a peep at its contents. In the present stage of the question, when the contending parties are at daggers drawn, it would be interesting to know what the National Railway Board think of this storm in a tea-pot. The Inspector swears he is right; the fact is, there never yet was an inspector who was not in the right. But the same blissful quality appears to be likewise the privilege of a railway-manager. "En fin", we cannot help thinking that the public might have been spared all this fuss, quarrelling, and squabbling, if the parties concerned had displayed more moderation and less "amour-propre".

The kilometrage run by the Primer Entre Riano last month amounted to a little total of 3,332 kilometres. The traffic returns in the same month were: Gross receipts $1,297; working expenses $906. Net earnings $391. The Primer Entre Riano, like the violet, is gifted with the quintessence of modesty. The snug little balance in its favor for the end of the month, although not quite sufficient to keep a London Board on good terms with turtle and champagne, is nevertheless, from a mathematical and material point of view, immeasurably superior

EXPLORATION & MANUFACTORY OF ARGENTINE WOODS.

Approved by decree of the National Government dated 30th March 1889,

Authorized Capital $5,000000, divided into 5 series of 10 000 shares of $100 each

Payments 10 per cent every 3 months, like a Savings Bank.

When the 1st series is subscribed, the 4 remaining series will be offered to the public up to the 5th of June next,

The Society was started by 100 founders amongst them being 55 timber merchants of Buenos Ayres, La Plata, Rosario, San Nicolas ned Montevideo, all skilled in the trade.

This is the most important and indispensable Industrial Undertaking of the country, and the one which offers the largest prospect of profit to its shareholders, from the opportunities it possesses of obtaining concessions and purchasing forests, of the richest and strongest woods requiring only the hand of the practical and scientific man and the power of capital to create the means of transport and economical manufacture, sales being sure, remunerative and easy in this Republic, as well as in Uruguay and Europe, in consequence of the natural requirements of Industry and Building. No business man or capitalist should delay subscribing for his own and his country's sake, freeing us from the enormous annual tax of $12,000,000 now paid by us to foreigners for woods inferior to the Argentine.

The week opens on 'Change without any marked departure from the features that characterised the closing operations on Saturday. National Bank Shares betray a falling tendency that indicates clearly how the speculation for a fall is still paramount at the ring, in spite of the severe check suffered by the bears on Thursday and Friday; and the rumoured bullish syndicate, which is to take up 40,000 shares, is pooh-poohed. It may well be that the capital required to take up these shares, say 10 millions, should cause a certain amount of suspicion to be attached to the rumour, but those who are well informed on the point say that the syndicate has both the means and will to take up the shares; and as the members are amongst the most responsible men in the market, the bears may expect a very stiff corner for end of month, if they cause any precipitate fall in the stock by heavy sales in "descubierto." Operations are beginning to show a decided shrinkage in volume, the business in the stock to-day barely embracing 7,800 shares for all dates at averagely steady rates. In Cedulas there was little done in National series, but rates were sustained, a state of affairs totally reversed in the Provincial kinds, which were largely dealt in, but at weakening rates. The Credito Real Shares shewed a very buoyant tendency, improving to 142 for end of month and 145½ for end of June, whilst Constructors also advanced, closing at 133 cash and 135 end of month. These are the only stocks for which there seems to be any inquiry.

The following is a summary of operations effected this afternoon during the first ring:—

The annual Report and Balance Sheet of the Banco Popular Argentino, an institution on Cooperative basis, was handed round to-day and shews that this institution is in a most flourishing state, having no less than 1803 members, to whom 1005 loans of from 20 to 10,000 dollars were made on their shares. Under Mr. Lixto Quesada's able management the bank is susceptible of great advance.

From Rosario the sale is reported of the camp property known as the Molino de Laneta, containing 121,559 square yards. The price paid is 400,000 dollars, buyer Mr Melara of the firm of Melara and Marti.

The Custom House rule requiring "conforme" of lighter company to manifest of goods before despatch has been suspended is giving rise to much inconvenience and delay.

The Tucuman Government is about to start an agricultural Mortgage bank with capital of 6 million gold dollars, the project having been already laid before the Legislature, where it meets with general approval. Banks are, no doubt, a great factor of progress, but there can be even a surfeit of banks, especially if they are not worked on the most prudent system.

There was a decidedly better feeling in the market to-day; exchange advanced, and some of the private banks are drawing at 47 1/8. Gold fell sensibly, and parties who wanted to sell round amounts could not get even 158. It appears that one million gold in bills on London has been paid into the Nat. Bank by the Bank of San Juan, and this, of course, affects the exchange market.

The Municipal Loan of Buenos Ayres, which, according to the telegram from London to the Bolsa, was such a brilliant success, is for two millions sterling, instead of one million, as generally supposed on Saturday. The loan was taken from the Municipality by the National Bank last year when Mr. Cranwell was "Intendente." The London market took it up at once, and it was about one of the most successful loans done in London this year. Of course, this loan also greatly benefits our market, and places the National Bank with a large amount of funds.

It is whispered in the market that one of Minister Varela's financial projects is directed against the gold "conforme" of the private banks, and that only those banks which have come under the Free Banking Law will be allowed to issue gold "conformes."

Mr. Dickson, M. P. for Dublin, who has arrived out in the Atrato, was welcomed. This distinguished gentlman has large interests in the River Plate, which he now visits for the first time. Mr Dickson is one of the most prominent members of the Liberal party, and Mr. Gladstone's right hand man in most of the difficult elections where the Gladstonians won; he is a thorough Home Ruler, and a large employer of labor at his linen mills in the north of Ireland. We offer him a warm welcome, and hope that he will enjoy his visit to this country.

The business at the second hour was not strikingly important, and brokers report that the market is in an indecessive mood, as it seems that much importance is attached to Minister Varela's rumoured measures which will be sent to Congress this week. National Bank shares improved to 249½, closing buyers for end of month and at 253 for end of June. Cedulas, as in the morning, reflected buoyancy for the National series and weakness in Provincial, N closing down to 76, which is a very low rate indeed, though perhaps not so bad as the O Series, which bears the same interest and is quoted in the immediate neighbourhood of 75. Flores Constructors dropped to 104, but Credito Real and Constructors keep up in spite of a very dull market.

Gold ruled more or less normal during the day, with perhaps a slight falling tendency; the closing rate was spoken of at 157½.

The magnificent Italian steamer Nord America clears to-morrow, and to-day we received from Mr. Christophersen the list of first and second-class passengers, printed on gilt fringed letter paper, which shows the style and elegance with which the Veloce company does everything. The list is too long for us. We note Mr. Rodriguez Larreta and family, Mr. Ximenes, Mr. Ferro, Boettner, and hundreds of others. We can safely recommend them the wines on board; there is nothing to beat the Chianti and Capri on the steamers of the Veloce line.

Very fresh papers from London were received to-day by one of Lamport and Holt's steamers, we believe dates to 24th ult.

We call attention to the very important underwriters' auction sales by Gowland and Co. announced in another column.

There was quite a crowd collected round the Montevideo telegram board at the second hour, reading the news of the advance of the Obras Shares to 100½ for cash and realizing what fortunes have been made by those who had faith in this Stock and bought at waste paper rates. This par quotation shews what confidence is reposed in the stock now, and in the new board of directors.

A Cab business sold for $800,000 was the talk of the market to-day; and it seems that the purchasers are a company who will start business with a capital of $1,300,000. The sellers are Messrs. Andino and Yribarne, and the business is the well known Cocheria in Calle Corrientes with its branches.

A new Steam washing and ironing Company is on the tapis with a capital of $1,000,000 in 5 dollars share The statutes are before Government for approval.

The s. s. Zephyrus, Houlder line, arrived yesterday from London.

The s. s. Citta di Genova, a new Lavarello liner, has arrived in the Mount with 650 passengers and 600 tons cargo for this port.

The s. s. Equateur left Rio on Saturday for the Plate.

The National Bank discounted freely in paper to-day, though exact amount was not known, and it seems that the Provincial Bank will resume discounts immediately and on a large scale, which will be a great help to the Stock market.

A decree was issued yesterday naming the Managing Committee of the Riachuelo Works as follows:—President, Dr. Bustamente; Vice-President, Don Juan Drysdale; Vocales—S. Rosetti, M. Unzue, and Dr. J. Bengolea.

The National Bank gave out yesterday by order of the Finance Minister $92.225 at from 155½ to 159

The Health Board has proposed to the Minister of Foreign Affairs to reduce the quarantine on vessels from Brazil to five days.

The R.M.S. Tagus arrived at Southampton this morning as per telegram dated 9 a.m.; 22½ days from here.

News from the Mount announces a terrific ampero blowing in the roads, which caused the loss of several sailing-vessels, amongst them Spanish barque Oswaldo, with captain and three of the hands. The National Credit Company blankly refuse to receive the Italian Bank's notes, and an action at law will soon be tried in the Courts with regard to the shares mortgaged to the bank by Reus. The dispute between the ass' Congo's agent and discontented passengers has been arranged by the latter being reimbursed amount of their passages in full; the agent frankly acknowledged that he had been led to believe that the boat would not touch at Rio, but had received latest on instructions to dispatch for that port. The Olimpo brought 79,938 dollars in specie, of which 77,100 was from Buenos Aires, principally for London and Brazilian Bank.

Affairs in Montevideo look brighter than ever, and the shares of the Obras Publicas keep steadily rising, owing to the very large purchases for account of orders from B. Ayres. The death of General Santos removes a slight political cloud, as the General, although banished, always had a party; and when the news of his death reached the Montevidean Bolsa everything improved. The admirable management of the Obras Co. by Mr. Casey has shewn its results, and the shares, which a couple of months ago were down to 80 discount, are now selling at a premium. The result of the auction of houses in the Reus Barrio is so favorable that the Company is using every effort to finish the remaining houses, and another auction will be held in a month or so. The demand for small houses in Montevideo at low rents is so great that the Co. is now about to construct five thousand such houses, which will give new value to all the ground it at present holds, and make the shares cheap at double their present value. Some of the best and most valuable properties in Montevideo and in the Banda Orientai, including the tramways, and the magnificent electric light establishment, belong to this company; and it is well known in certain circles in Montevideo that this company, when it concludes the sale of its 537 houses in the Reus Barrio, and launches the electric light Co. will have 2/3 of its capital realized, leaving the shareholders in possession of properties and concessions worth more than the whole original capital of the Company. The stock to-day is considered some of the very best in the Montevidean market, and all the banks lend freely on it. We congratulate Mr. Casey on his most brilliant success. We doubt if there is any other man in the Plate who in so short a time could have done what he has so successfully effected.
